Contributors .....	ix
Foreword .....	xi
Preface .....	xiii
<b>1 Introduction .....</b>	<b>1</b>
1.1 Overview .....	1
1.1.1 EUVL History .....	6
1.1.2 Applications .....	15
1.2 Photomasks .....	16
1.2.1 Glass Substrate .....	17
1.2.2 Multilayer Mirror .....	19
1.2.3 Capping Layer .....	19
1.2.4 Absorber Layer .....	19
1.2.5 Defect Mitigation and Handling Strategy .....	20
1.3 Resist Films .....	20
1.3.1 RLS Triangle .....	21
1.3.2 Outgassing .....	22
1.4 Exposure .....	23
1.4.1 Source-Collector Module (SoCoMo) ...	24
1.4.2 Debris Mitigation .....	26
1.5 Printing .....	27
1.5.1 Shadowing and Flare Compensation ...	27
1.5.2 Resolution-Enhancement Techniques (RETs) .....	29
1.6 Future Enhancements .....	29
References .....	30
<b>2 Exposure System .....</b>	<b>31</b>
2.1 Introduction: Extreme Ultraviolet Lithography (EUVL), Extension of Optical Lithography ...	31
2.1.1 Overview of Optical Lithography .....	31
2.1.2 Optical Fundamentals for Lithography .....	33
2.1.3 Benefits of EUVL .....	39
2.2 EUVL-Specific Challenges .....	44
2.2.1 Introduction .....	44
2.2.2 Source .....	44
2.2.3 Vacuum .....	45
2.2.4 Reflective Optics .....	45

2.2.5	Mask Defects .....	46
2.2.6	Mask Nontelecentricity .....	46
2.2.7	Flare .....	46
2.2.8	Mechanics .....	47
2.3	EUVL System Performance Predictions .....	47
2.3.1	Introduction .....	47
2.3.2	Optical Transfer Function (OTF) Modeling .....	47
2.3.3	Process Window Modeling .....	50
2.3.4	Mask Shadowing .....	52
2.4	EUVL Systems Overview .....	54
2.4.1	Introduction .....	54
2.4.2	Overview of the ETS .....	55
2.4.3	Overview of the ASML Alpha Demo Tool .....	64
2.5	Detailed Analysis and Performance Characterization of an EUVL Microstepper ...	73
2.5.1	Introduction .....	73
2.5.2	MET System Overview .....	73
2.5.3	MET Predicted Resolution Limit .....	76
2.5.4	Tool Characterization .....	78
2.6	Pupil-Fill Control in EUVL .....	82
2.6.1	Introduction .....	82
2.6.2	Benefits of Pupil-Fill Control .....	83
2.6.3	Pupil-Fill Control Methods in EUVL ...	84
2.6.4	Demonstration of Modified Illumination in EUVL .....	88
2.7	Flare .....	90
2.7.1	Introduction .....	90
2.7.2	Computing/Predicting Flare .....	92
2.7.3	Measuring Flare .....	94
2.8	Optical Components for EUVL .....	96
2.8.1	Grating-Based High-Efficiency Spectral-Purity Filter .....	96
2.8.2	Diffraction Optical Elements for Pupil-Fill Control .....	105
	References .....	112
<b>3</b>	<b>EUV Sources .....</b>	<b>121</b>
3.1	Introduction .....	121
3.1.1	History of Sources in the EUV Region ...	124
3.1.2	Considerations from Early Source Studies for EUVL .....	126
3.1.3	Early Discharge- and Laser-Produced Plasma Concepts .....	128
3.1.4	Current Directions of Development ...	130

3.2	Current EUVL Roadmap Requirements	130
3.2.1	EUV Radiation Characteristics	130
3.2.2	Lifetime and Stability	133
3.2.3	EUV Light Generation and Overall Efficiency	133
3.2.4	Footprint and Cost of Ownership	134
3.3	DPP Sources	135
3.3.1	Theoretical Background for Discharge Plasmas	135
3.3.2	The Dense-Plasma-Focus EUV Source	136
3.3.3	The Hollow-Cathode Pinch-Plasma Source	140
3.3.4	The Z-Pinch-Plasma Source	143
3.3.5	Star-Pinch-Plasma EUV Source	144
3.3.6	Capillary-Discharge Sources	144
3.3.7	EUV Collectors for DPP Sources	145
3.3.8	Debris-Mitigation Schemes for DPP Sources	146
3.4	Laser-Plasma Sources	148
3.4.1	Physics of Laser-Plasma EUV Sources	149
3.4.2	Spectral Emission from Tin	151
3.4.3	Computer Code Modeling of Plasma and Radiation	153
3.4.4	Laser-Plasma Source Architectures	155
3.4.5	EUV Conversion Efficiency	157
3.4.6	Particle, Neutral-Atom, and Ion Debris	160
3.4.7	Debris Mitigation for Laser-Plasma Sources	162
3.4.8	EUV Collection Optics for LPP Sources	163
3.5	Future Trends	165
3.5.1	Integrated Sources Using Laser Plasmas	166
3.5.2	Pushing for More Power	166
3.5.3	Changes in Source Technologies	167
	References	167
<b>4</b>	<b>EUV Optics</b>	<b>175</b>
4.1	Introduction	175
4.1.1	Lithography Using 13.5-nm Light	176
4.1.2	Optical Properties in the EUV Spectral Range	176
4.1.3	EUV Optical Components	179
4.2	Optical Designs	184
4.2.1	Condensers and Illuminators	186
4.2.2	Basic Imaging System Requirements	188

4.2.3	Projection Optics for Microsteppers	191
4.2.4	Projection Optics—Scanners with NA < 0.25	195
4.2.5	Projection Optics—Scanners with NA ≥ 0.25	198
4.3	Optics Fabrication and Metrology	199
4.3.1	Requirements	199
4.3.2	Substrate Fabrication and Metrology	201
4.3.3	Multilayer Films	205
4.3.4	At-Wavelength Metrology	207
4.4	Optics Lifetime	213
4.4.1	Contamination Processes	214
4.4.2	Impact of Contamination	218
4.4.3	Mitigation and Cleaning Techniques	218
4.5	Summary and Outlook	220
	Acknowledgments	221
	References	221
<b>5</b>	<b>Multilayer Interference Coatings for EUVL</b>	<b>225</b>
5.1	Overview and History of Multilayer Coatings in EUVL	226
5.2	Main Requirements for EUVL Coatings	229
5.3	Design of EUV Multilayer Coatings	231
5.3.1	Optical Constants and Material Selection	231
5.3.2	High-Reflective Mo/Si Mirrors	235
5.3.3	Broadband and Narrowband Mirrors	238
5.4	Multilayer Deposition Technologies	241
5.5	Imperfections in Mo/Si Multilayer Mirrors	244
5.6	Interface-Engineered Mo/Si Coatings	247
5.6.1	Mirrors with Enhanced Reflectance	249
5.6.2	Mirrors with Enhanced Thermal Stability	250
5.7	Stability of Mo/Si Coatings	253
5.7.1	Thermal Stability	253
5.7.2	Radiation Stability	256
5.8	Stress Reduction in Mo/Si Coatings	259
5.9	Concluding Remarks	262
	Acknowledgments	263
	References	263
<b>6</b>	<b>EUV Metrology</b>	<b>271</b>
6.1	Introduction	271

6.2	Optical Critical-Dimension (OCD) Techniques	
	Using Scatterometry	272
6.2.1	Introduction, Limits of OCD	272
6.2.2	Scatterometry Measurement Modes	273
6.2.3	Test Structures and Models	273
6.2.4	Model Descriptions	274
6.2.5	Model Stability	275
6.2.6	Fundamental Limits	278
6.2.7	Sensitivity Analysis	280
6.2.8	EUV Mask Optical Inspection	282
6.3	OCD Using High-Resolution Microscopy	283
6.3.1	CD Metrology	284
6.3.2	Arrayed CD Targets	288
6.4	AFM for Wafer and EUV Mask Metrology	291
6.4.1	Reference Metrology Applications	292
6.4.2	AFM Data Output	293
6.4.3	Instrument Accuracy	294
6.4.4	New Directions in AFM Metrology	296
6.5	Optical Techniques for Overlay Metrology	
	in EUVL	297
6.5.1	Imaging Techniques for Overlay	298
6.5.2	In-Chip Overlay Targets	303
6.5.3	Superstructure Target Designs	304
6.5.4	Scatterometry for Overlay	305
6.6	Charged-Particle CD Metrology	315
6.6.1	Contamination-Free Operation	320
6.6.2	High-Precision Image and Data	
	Acquisition	322
6.6.3	Accurate Model-Based Dimensional	
	Metrology	325
	Acknowledgments	326
	References	327
<b>7</b>	<b>EUV Photoresist</b>	<b>331</b>
7.1	Introduction	331
7.1.1	Evolutionary Changes in Resist	
	Technologies	331
7.1.2	History and Description of Chemically	
	Amplified Resists	335
7.2	Chemically Amplified (CA) Resists	338
7.2.1	Acid Diffusion in CA Resists	339
7.2.2	DUV Resist Image Thermal	
	Stability	340
7.3	193-nm Resists	341
7.3.1	193-nm Acrylic SLRs	343
7.3.2	Etch-Resistant Resists	343

7.4	EUV Resists	345
7.4.1	Special Requirements for EUV Resists	345
7.4.2	EUV Resist Exposure Performance	347
7.4.3	EUV Resist Materials and Polymers	355
7.4.4	EUV PAGs	362
7.4.5	Multilayer Resists and Pattern Transfer	366
7.5	Absorption Coefficients of EUV Resists	368
7.6	Line-Edge Roughness (LER)	372
7.7	Pattern Collapse	373
7.8	Outgassing	376
7.9	Summary	379
	References	380
<b>8</b>	<b>EUVL Masks</b>	<b>385</b>
8.1	Introduction	385
8.1.1	Masks and Lithography	385
8.1.2	Overview of EUVL Masks	388
8.2	EUVL Mask Substrates	389
8.2.1	Coefficient of Thermal Expansion	390
8.2.2	Substrate Surface	391
8.3	EUVL Mask Blanks	394
8.3.1	Multilayer	396
8.3.2	Defect Inspection of Blank Masks	397
8.3.3	Defect Control of Blank Masks	399
8.4	EUVL Mask Absorber	403
8.4.1	Requirements of the EUVL Absorber Stack	403
8.4.2	Absorber Materials	405
8.5	EUVL Mask Pattern Generation	407
8.5.1	E-Beam Exposure	408
8.5.2	Resist Processing	413
8.6	EUVL Mask Etch	415
8.6.1	Plasma Etch Fundamentals	415
8.6.2	EUV Absorber-Layer Etching	421
8.6.3	Buffer-Layer Etching	426
8.7	Backend and Defect Control	427
8.7.1	Cleaning	427
8.7.2	Inspection	435
8.7.3	Repair	441
8.8	EUVL Mask Protection	447
8.8.1	Mask without Pellicle	447
8.8.2	Thermophoretic "Pellicle" Approaches	449
8.9	Conclusions	452
	References	453
