Contents

Acknowledgments	xi
Introduction	xiii
1 BEx Web Analyzer Reporting Functionality	1
Status of Reporting Tools in SAP BI	2
Introduction to the BEx Web Analyzer	2
Accessing the BEx Web Analyzer	4
Navigation Options in the BEx Web Analyzer	7
Summary	54
2 Getting a Fast Start with BI Patterns in the BEx Web Template	57
Introduction to BI Patterns and the BEx Web Template	58
Using BI Patterns with the Pattern Wizard	58
Configuration of the BI Patterns in the Web Application Designer	60
Small Web Template with Analysis Web Item and 1 DP	62
Small Web Template with Chart Web Item and 1 DP	65
Small Web Template with Chart, Analysis Web Item and 1 DP	70
Information Consumer Pattern	74
Summary	80
3 Basics of the Web Application Designer	81
Introduction to the Web Application Designer (WAD)	82
Example WAD Reports	83
Overview of the WAD Interface	88
The WAD Screen Areas	89
The WAD Menu Bar and Toolbar Components	99
0ANALYSIS_PATTERN: Standard Web Template	108
0ANALYSIS_PATTERN Interface	109
0ANALYSIS_PATTERN EXPORT Interface	113
Summary	116
4 Advanced Configuration Using the Web Application Designer	117
Setting Up the Initial Web Template for Use in the WAD	118
Web Template Properties	119
Web Template Formatting Components	123
Creating a Web Template	129
Configuration of Web Items	136
Configuration of a Web Template with Two Web Items	136
Groups of Web Items	146

Formatting with Web Template Layouts Format	214
Command Wizard	222
XHTML Features	231
JavaScript Features	234
Summary	235
5 Advanced Functionality of the Report Designer	237
Functionality of the Report Designer	238
Static and Dynamic Sections in a Report Designer Report	240
Row Patterns	241
Tips and Tricks for Using the Report Designer	245
Using Hierarchies in Your Reports	245
Using Templates in the Report Designer	254
Positioning Queries in the Report Designer	265
Example Using the Functionality of the Report Designer	266
Summary	281
6 Developing Effective Web Reports	283
Overview of Web Report Development	284
Introducing the Chart Web Item	284
Charts	284
Automatic Axis Labeling	289
Editing Charts	289
Chart Types	295
Formatting Charts Using the Wizard	330
Defining Chart Properties	338
Examples of Improved Chart Layout	354
Configuration of Commands	368
Integration	369
Commands for Web Items	370
Commands for Web Templates	375
Commands for Data Providers	375
Summary	382
7 Developing High-Impact Dashboards	385
Overview of the Development of Dashboards	386
Process of Developing a Dynamic Dashboard	387
Required Details of the KPIs	389
Tips on Visualization of Dynamic Dashboards	393
The Architecture of the Dashboard	407
Examples of Effective Dashboards	408
Summary	425
8 Migrating 3.x to 7.0 BEx Web Reports and the WAD	427
Overview of the Migration Process	427
Approach to Migration of Web-Based Reports	433

Migration Activities	435
Standard Business Content for Migration	436
WAD Library	437
Web Reports	439
WAD Templates	442
Variants	450
Steps in the Migration Process	458
Summary	462
9 Integration of SAP BusinessObjects Components	
into the BI Environment	463
Overview of the Integration and Positioning Process	464
Components of SAP BusinessObjects (BOBJ) for Reporting	466
Choosing the Right Tool for the Right Job	469
Web Intelligence (WebI)	471
Xcelsius	479
Crystal Reports	486
BusinessObjects Explorer	490
Summary	491
Index	493
