

# Contents

Preface ix

Acknowledgments x

- 1** Genetics: Unity and Diversity 1
- 2** Information Flow and Levels of Regulation 17
- 3** The Organization of Development 49
- 4** The Structure and Function of Genes 77
- 5** Clinical Cytogenetics 99
- 6** Mendelian Genetics: Patterns of Gene Transmission 139
- 7** Mutation 165
- 8** Metabolism 183
- 9** Family History and Pedigree Analysis 201
- 10** Multifactorial Inheritance and Gene × Environment Interactions 213
- 11** Genetic Testing and Screening 229
- 12** Atypical Modes of Inheritance 249
- 13** Disorders of Organelles 269
- 14** Genetic Therapeutics 297
- 15** Population Genetics and Genetic Diversity 309
- 16** Of Fruit Flies, Mice, and Patients: Tying It All Together 325

Key Genetic Diseases, Disorders, and Syndromes 341

Glossary 343

Answers to Board-Format Practice Questions 357

Index 365
