About the Authors

Bob Bryla is an Oracle 9i, 10g, and 11g Certified Professional with more than 20 years of experience in database design, database application development, training, and Oracle database administration. He is the primary Oracle DBA and database systems engineer at Epic in Verona, Wisconsin.

He is a technical editor for a number of Oracle Press books, including several certification study guides for Oracle Database 10g, 11g, and 12c. He has also been known to watch science fiction movies and tinker with Android devices in his spare time.

Kevin Loney is an internationally recognized expert in the design, development, administration, and tuning of Oracle databases. A technology and project group leader in the financial industry, he was named Consultant of the Year by *Oracle Magazine* in 2002. His best-selling books include *Oracle Database 11g DBA Handbook*, *Oracle Advanced Tuning and Administration*, and *Oracle SQL & PL/SQL Annotated Archives*. He is the author of numerous technical articles in industry magazines and presents at Oracle user conferences in North America and Europe, where he is regularly among the highest-rated presenters.

About the Contributor and Technical Editor

Scott Gossett (contributing author, technical editor) is a technical director in the Oracle Advanced Technologies Solutions organization with more than 20 years' experience specializing in RAC, performance tuning, and high-availability databases. Prior to becoming a technical director, Scott was a senior principal instructor for Oracle Education for over 12 years, primarily teaching Oracle internals, performance tuning, RAC, and database administration. In addition, Scott is one of the architects and primary authors of the Oracle Certified Master exam. Scott has been a technical editor for nine Oracle Press books.

Acknowledgments

Many technical books need the expertise of more than one person, and this one is no exception. Thanks to Kevin for his expertise on the previous editions of this book, making it a success.

Thanks also go out to all of the people at McGraw-Hill Education who kept this book on a reasonable schedule and learned to be even more patient with me than ever before, including Paul Carlstroem, Amanda Russell, and Jody McKenzie. Thanks also to Scott Gossett who gave me good advice when the theoretical met the practical. I would also be remiss if I didn't thank LeeAnn Pickrell who inspired flashbacks to my college writing courses.

Many of my professional colleagues at Epic were a source of both inspiration and guidance: Chris Tyne, Scott Hinman, and Lonny Niederstadt. In this case, the whole is truly greater than the sum of its parts.

If you have any questions or comments about any part of this book, please do not hesitate to contact me at rjbdba@gmail.com.
