ACKNOWLEDGMENTS	xxi
INTRODUCTION	xxiii
1 Introduction	1
What Is a Relational Database?	2
Introducing the Structured Query Language (SQL)	3
Using SQL*Plus	4
Starting the Windows Version of SQL*Plus	4
Starting the Command-Line Version of SQL*Plus	5
Performing a SELECT Statement Using SQL*Plus	7
The SQL*Plus Worksheet	8
Creating the Store Schema	8
Running the SQL*Plus Script to Create the Store Schema	9
Data Definition Language (DDL) Statements Used to Create the Store Schema	10
Adding, Modifying, and Removing Rows	20
Adding a Row to a Table	20
Modifying an Existing Row in a Table	21
Removing a Row from a Table	22
The New Oracle10g BINARY_FLOAT and BINARY_DOUBLE Types	22
Benefits of BINARY_FLOAT and BINARY_DOUBLE	23
Using BINARY_FLOAT and BINARY_DOUBLE in a Table	23
Special Values	24
Quitting SQL*Plus	25
Introducing Oracle PL/SQL	25
Summary	26
2 Retrieving Information from Database Tables	27
Performing Single Table SELECT Statements	28
Selecting All Columns from a Table	29
Understanding Row Identifiers	29
Performing Arithmetic	30

Using Date Arithmetic	31
Using Columns in Arithmetic	32
Using Column Aliases	33
Merging Column Output Using Concatenation	34
Understanding Null Values	35
Displaying Distinct Rows	36
Filtering Rows Using the WHERE Clause	37
Using Comparison Operators	37
Using the SQL Operators	39
Using the Logical Operators	42
Understanding Operator Precedence	43
Sorting Rows Using the ORDER BY Clause	43
Performing SELECT Statements that Use Two Tables	44
Supplying Table Aliases	47
Cartesian Products	47
Performing SELECT Statements that Use More than Two Tables	48
Understanding Join Conditions and Join Types	49
Understanding Non-equi Joins	50
Understanding Outer Joins	50
Understanding Self Joins	54
Performing Joins Using the SQL/92 Syntax	55
Performing Inner Joins on Two Tables Using SQL/92	55
Simplifying Joins with the USING Keyword	56
Performing Inner Joins on More than Two Tables Using SQL/92	57
Performing Inner Joins on Multiple Columns Using SQL/92	57
Performing Outer Joins Using SQL/92	58
Performing Self Joins Using SQL/92	59
Performing Cross Joins Using SQL/92	59
Summary	60
3 Using Simple Functions	61
Using Single Row Functions	62
Character Functions	62
Numeric Functions	71
Conversion Functions	76
Regular Expression Functions	83
Using Aggregate Functions	88
AVG()	90
COUNT()	90
MAX() and MIN()	91
STDDEV()	92
SUM()	92
VARIANCE()	92
Grouping Rows	93
Using the GROUP BY Clause to Group Rows	93
Incorrect Usage of Aggregate Function Calls	96
Using the HAVING Clause to Filter Groups of Rows	97

Using the WHERE and GROUP BY Clauses Together	98
Using the WHERE, GROUP BY, and HAVING Clauses Together	98
Summary	99
4 Storing and Processing Dates and Times	101
Simple Examples of Storing and Retrieving Dates	102
Converting Datetimes Using TO_CHAR() and TO_DATE()	104
Using TO_CHAR() to Convert a Datetime to a String	104
Using TO_DATE() to Convert a String to a Datetime	109
Setting the Default Date Format	112
How Oracle Interprets Two-Digit Years	113
Using the YY Format	113
Using the RR Format	114
Using Datetime Functions	115
ADD_MONTHS()	116
LAST_DAY()	117
MONTHS_BETWEEN()	117
NEXT_DAY()	118
ROUND()	118
SYSDATE()	119
TRUNC()	119
Understanding Time Zones	120
Time Zone–Related Functions	121
The Database Time Zone and Session Time Zone	121
Obtaining Time Zone Offsets	122
Obtaining Time Zone Names	122
Converting a Datetime from One Time Zone to Another	123
Using Timestamps	123
Using the Timestamp Types	123
Timestamp–Related Functions	128
Using Time Intervals	132
Using the INTERVAL YEAR TO MONTH Type	133
Using the INTERVAL DAY TO SECOND Type	135
Time Interval–Related Functions	137
Summary	138
5 Using SQL*Plus	141
Viewing the Structure of a Table	142
Editing SQL Statements	143
Saving, Retrieving, and Running Files	145
Formatting Columns	148
Setting the Page Size	150
Setting the Line Size	151
Clearing Column Formatting	151
Using Variables	152
Temporary Variables	153
Defined Variables	155

Creating Simple Reports	158
Using Temporary Variables in a Script	158
Using Defined Variables in a Script	158
Passing a Value to a Variable in a Script	159
Adding a Header and Footer	160
Computing Subtotals	161
Automatically Generating SQL Statements	162
Summary	163
6 Subqueries	165
Types of Subqueries	166
Writing Single Row Subqueries	166
Subqueries in a WHERE Clause	166
Subqueries in a HAVING Clause	168
Subqueries in a FROM Clause (Inline Views)	169
A Couple of Errors You Might Encounter	170
Writing Multiple Row Subqueries	171
Using IN with a Multiple Row Subquery	171
Using ANY with a Multiple Row Subquery	172
Using ALL with a Multiple Row Subquery	172
Writing Multiple Column Subqueries	173
Writing Correlated Subqueries	173
A Correlated Subquery Example	173
Using EXISTS and NOT EXISTS with a Correlated Subquery	174
Writing Nested Subqueries	176
Writing UPDATE and DELETE Statements Containing Subqueries	178
Writing an UPDATE Statement Containing a Subquery	178
Writing a DELETE Statement Containing a Subquery	179
Summary	179
7 Advanced Queries	181
Using the Set Operators	182
The Example Tables	183
Using the UNION ALL Operator	184
Using the UNION Operator	185
Using the INTERSECT Operator	186
Using the MINUS Operator	186
Combining Set Operators	187
Using the TRANSLATE() Function	188
Using the DECODE() Function	190
Using the CASE Expression	191
Using Simple CASE Expressions	191
Using Searched CASE Expressions	192
Hierarchical Queries	194
The Example Data	194
Using the CONNECT BY and START WITH Clauses	196
Using the LEVEL Pseudo-Column	197

Formatting the Results from a Hierarchical Query	197
Starting at a Node Other than the Root	198
Using a Subquery in a START WITH Clause	199
Traversing Upward Through the Tree	199
Eliminating Nodes and Branches from a Hierarchical Query	200
Including Other Conditions in a Hierarchical Query	201
Using the Extended GROUP BY Clauses	201
The Example Tables	201
Using the ROLLUP Clause	203
Using the CUBE Clause	206
Using the GROUPING() Function	207
Using the GROUPING SETS Clause	210
Using the GROUPING_ID() Function	210
Using a Column Multiple Times in a GROUP BY Clause	212
Using the GROUP_ID() Function	213
Using the Analytic Functions	214
The Example Table	215
Using the Ranking Functions	216
Using the Inverse Percentile Functions	223
Using the Window Functions	223
Using the Reporting Functions	229
Using the LAG() and LEAD() Functions	232
Using the FIRST and LAST Functions	232
Using the Linear Regression Functions	233
Using the Hypothetical Rank and Distribution Functions	234
Using the MODEL Clause	235
An Example of the MODEL Clause	235
Using Positional and Symbolic Notation to Access Cells	237
Accessing a Range of Cells Using BETWEEN and AND	238
Accessing All Cells Using ANY and IS ANY	238
Getting the Current Value of a Dimension Using CURRENTV()	239
Accessing Cells Using a FOR Loop	240
Handling Null and Missing Values	241
Updating Existing Cells	243
Summary	244
8 Changing Table Contents	247
Adding Rows Using the INSERT Statement	248
Omitting the Column List	249
Specifying a Null Value for a Column	249
Including Single and Double Quotes in a Column Value	250
Copying Rows from One Table to Another	250
Modifying Rows Using the UPDATE Statement	250
The RETURNING Clause	252
Removing Rows Using the DELETE Statement	252
Database Integrity	253
Enforcement of Primary Key Constraints	253
Enforcement of Foreign Key Constraints	254

Using Default Values	255
Merging Rows Using MERGE	256
Database Transactions	258
Committing and Rolling Back a Transaction	259
Starting and Ending a Transaction	260
Savepoints	260
ACID Transaction Properties	262
Concurrent Transactions	262
Transaction Locking	264
Transaction Isolation Levels	264
A SERIALIZABLE Transaction Example	265
Query Flashbacks	266
Granting the Privilege for Using Flashbacks	266
Time Query Flashbacks	267
System Change Number Query Flashbacks	268
Summary	270
9 Database Security	271
Users	272
Creating a User	272
Changing a User's Password	273
Deleting a User	274
System Privileges	274
Granting System Privileges to a User	274
Checking System Privileges Granted to a User	275
Making Use of System Privileges	276
Revoking System Privileges from a User	277
Object Privileges	277
Granting Object Privileges to a User	278
Checking Object Privileges Made	278
Checking Object Privileges Received	280
Making Use of Object Privileges	282
Synonyms	283
Public Synonyms	284
Revoking Object Privileges	284
Roles	285
Creating Roles	285
Granting Privileges to Roles	285
Granting Roles to a User	286
Checking Roles Granted to a User	286
Checking System Privileges Granted to a Role	287
Checking Object Privileges Granted to a Role	288
Making Use of Privileges Granted to a Role	290
Default Roles	290
Revoking a Role	291
Revoking Privileges from a Role	291
Dropping a Role	291
Summary	291

10	Creating Tables, Sequences, Indexes, and Views	293
	Tables	294
	Creating a Table	294
	Getting Information on Tables	296
	Getting Information on Columns in Tables	297
	Altering a Table	298
	Renaming a Table	307
	Adding a Comment to a Table	308
	Truncating a Table	308
	Dropping a Table	309
	Sequences	309
	Creating a Sequence	309
	Getting Information on Sequences	311
	Using a Sequence	312
	Populating a Primary Key Using a Sequence	314
	Modifying a Sequence	315
	Dropping a Sequence	315
	Indexes	315
	Creating an Index	316
	Creating a Function-Based Index	317
	Getting Information on Indexes	318
	Getting Information on the Indexes on a Column	318
	Modifying an Index	320
	Dropping an Index	320
	Views	320
	Creating and Using a View	321
	Modifying a View	328
	Dropping a View	329
	Summary	329
11	Introducing PL/SQL Programming	331
	Block Structure	332
	Variables and Types	334
	Conditional Logic	335
	Loops	335
	Simple Loops	336
	WHILE Loops	336
	FOR Loops	336
	Cursors	337
	Step 1: Declare the Variables to Store the Column Values	338
	Step 2: Declare the Cursor	338
	Step 3: Open the Cursor	338
	Step 4: Fetch the Rows from the Cursor	339
	Step 5: Close the Cursor	340
	Complete Example: product_cursor.sql	340
	Cursors and FOR Loops	341

Exceptions	342
ZERO_DIVIDE Exception	345
DUP_VAL_ON_INDEX Exception	345
INVALID_NUMBER Exception	346
OTHERS Exception	346
Procedures	347
Creating a Procedure	347
Calling a Procedure	350
Getting Information on Procedures	350
Dropping a Procedure	351
Viewing Errors in a Procedure	351
Functions	352
Creating a Function	352
Calling a Function	353
Getting Information on Functions	354
Dropping a Function	354
Packages	354
Creating a Package Specification	355
Creating a Package Body	356
Calling Functions and Procedures in a Package	357
Getting Information on Functions and Procedures in a Package	358
Dropping a Package	358
Triggers	358
When a Trigger Runs	359
Set Up for the Example Trigger	359
Creating a Trigger	359
Firing a Trigger	361
Getting Information on Triggers	362
Disabling and Enabling Trigger	364
Dropping a Trigger	364
Summary	365
12 Database Objects	367
Introducing Objects	368
Creating Object Types	368
Using DESCRIBE to Get Information on Object Types	370
Using Object Types to Define Column Objects and Object Tables	371
Object References and Object Identifiers	372
Performing DML on the products Table	372
Inserting Rows into the products Table	372
Selecting Rows from the products Table	373
Updating a Row in the products Table	374
Deleting a Row from the products Table	374
Performing DML on the object_products Table	375
Inserting Rows into the object_products Table	375
Selecting Rows from the object_products Table	375
Updating a Row in the object_products Table	376
Deleting a Row from the object_products Table	376

Performing DML on the object_customers Table	376
Inserting Rows into the object_customers Table	377
Selecting Rows from the object_customers Table	377
Performing DML on the purchases Table	378
Inserting a Row into the purchases Table	378
Selecting a Row from the purchases Table	379
Updating a Row in the purchases Table	379
Using Objects in PL/SQL	380
Type Inheritance	382
NOT INSTANTIABLE Object Types	383
User-Defined Constructors	385
Summary	387
13 Collections	389
Introducing Collections	390
Varrays	391
Creating a Varray Type	391
Using a Varray Type to Define a Column in a Table	392
Getting Information on Varrays	392
Populating a Varray with Elements	394
Selecting Varray Elements	394
Modifying Varray Elements	394
Nested Tables	395
Creating a Nested Table Type	395
Using a Nested Table Type to Define a Column in a Table	395
Getting Information on Nested Tables	396
Populating a Nested Table with Elements	398
Selecting Nested Table Elements	398
Modifying Nested Table Elements	398
Multilevel Collection Types	399
Using Collections in PL/SQL	401
Manipulating Varrays	401
Manipulating Nested Tables	404
Collection Methods	405
Oracle10g Enhancements to Collections	414
Associative Arrays	414
Changing the Size or Precision of an Element Type	415
Increasing the Number of Elements in a Varray	416
Using Varrays in Temporary Tables	416
Using a Different Tablespace for a Nested Table's Storage Table	416
ANSI Support for Nested Tables	417
Summary	425
14 Large Objects	427
Introducing Large Objects (LOBs)	428
The Example Files	428
Understanding the Large Object Types	429

Creating Tables Containing Large Objects	430
Using Large Objects in SQL	431
Using CLOBs and BLOBs	431
Using BFILES	432
Using Large Objects in PL/SQL	434
READ()	436
WRITE()	439
APPEND()	441
CLOSE()	442
COMPARE()	443
COPY()	445
CREATETEMPORARY()	447
ERASE()	449
FILECLOSE()	450
FILECLOSEALL()	451
FILEEXISTS()	451
FILEGETNAME()	452
FILEISOPEN()	453
FILEOPEN()	453
FREETEMPORARY()	454
GETCHUNKSIZE()	455
GET_STORAGE_LIMIT()	455
GETLENGTH()	455
INSTR()	456
ISOPEN()	459
ISTEMPORARY()	460
LOADFROMFILE()	460
LOADBLOBFROMFILE()	464
LOADCLOBFROMFILE()	464
OPEN()	466
SUBSTR()	467
TRIM()	468
WRITEAPPEND()	469
Understanding the LONG and LONG RAW Types	470
The Example Tables	470
Using LONG and LONG RAW Columns	470
Oracle Database 10g Enhancements to Large Objects	471
Implicit Conversion Between CLOB and NCLOB Objects	472
Use of the :new Attribute When Using LOBs in a Trigger	473
Summary	474
15 Running SQL Using Java	475
Getting Started	476
Configuring Your Computer	477
Setting the ORACLE_HOME Environment Variable	477
Setting the JAVA_HOME Environment Variable	478
Setting the PATH Environment Variable	478

Setting the CLASSPATH Environment Variable	479
Setting the LD_LIBRARY_PATH Environment Variable	480
The Oracle JDBC Drivers	480
The Thin Driver	480
The OCI Driver	480
The Server-Side Internal Driver	481
The Server-Side Thin Driver	481
Importing the JDBC Packages	481
Registering the Oracle JDBC Drivers	481
Opening a Database Connection	482
Connecting to the Database Using the getConnection() Method of the DriverManager Class	482
Connecting to the Database Using an Oracle Data Source	484
Creating a JDBC Statement Object	487
Retrieving Rows from the Database	487
Step 1: Create and Populate a ResultSet Object	488
Step 2: Read the Column Values from the ResultSet Object	488
Step 3: Close the ResultSet Object	491
Adding Rows to the Database	491
Modifying Rows in the Database	492
Deleting Rows from the Database	493
Handling Numbers	493
Handling Database Null Values	495
Controlling Database Transactions	497
Performing Data Definition Language Statements	498
Handling Exceptions	498
Closing Your JDBC Objects	499
Example Program: BasicExample1.java	501
Compile BasicExample1	507
Run BasicExample1	507
Prepared SQL Statements	509
Example Program: BasicExample2.java	512
The Oracle JDBC Extensions	514
The oracle.sql Package	515
The oracle.jdbc Package	519
Example Program: BasicExample3.java	523
Summary	527
16 High Performance SQL Tuning	529
Introducing SQL Tuning	530
Use a WHERE Clause to Filter Rows	530
Use Table Joins Rather than Multiple Queries	531
Use Fully Qualified Column References When Performing Joins	532
Use CASE Expressions Rather than Multiple Queries	533
Add Indexes to Tables	534
Use WHERE Rather than HAVING	534
Use UNION ALL Rather than UNION	535

XX Oracle Database 10g SQL

Use EXISTS Rather than IN	537
Use EXISTS Rather than DISTINCT	537
Use Bind Variables	538
Non-Identical SQL Statements	538
Defining Identical SQL Statements Using a Bind Variable	539
Listing and Printing Bind Variables	540
Using a Bind Variable to Store a Value Returned by a PL SQL Function	540
Using a Bind Variable to Store Rows from a REFCURSOR	541
Comparing the Cost of Performing Queries	541
Examining Execution Plans	542
Comparing Execution Plans	547
Passing Hints to the Optimizer	548
Additional Tuning Tools	549
Statspack Package	549
Oracle Enterprise Manager Diagnostics Pack	549
Automatic Database Diagnostic Monitoring	549
Summary	550
A Oracle Data Types	551
Oracle SQL Types	552
Oracle PL/SQL Types	555
Index	557
